

Client Testimonials

“Top class course and tutorship! Highly recommended.”

Peter Jas, Bunbury Regional Hospital

“It was a fun and informative course, well presented in an adult learning environment.”

Jason Lee, City of Bunbury

“An excellent, professional and informative course for all in our team. I hope I never have to use what I have learnt but feel reassured you have taught me well if I do.”

Kim Morris, Cable Force

“Extremely valuable well presented and a definite for all tradies.”

Dean Taylor, Warren Electrical Services

“Many thanks for the informative course. It was fast paced and covered a lot of topics. Was good to have the latest best practice knowledge. Highly recommended to anyone regardless of their knowledge and experience.”

Scott Wilson, S&J Excavations

“Well paced, treated prior knowledge with respect. Fun and interesting. Our trainer was excellent at communicating and keeping things moving.”

David Brindle

Company Guiding Principles

Corporate First Aid Australia (CFAA) is committed to providing quality locally trained and highly skilled carers to address workforce shortages in the community services and health sector in the South West.

CFAA strives to ensure trained health care professionals are work ready to take advantage of regional and state wide employment opportunities.

CFAA aims to retain its reputation as specialists in the delivery of high quality health and community services training by ensuring graduates are of the highest calibre.

Provide Cardiopulmonary Resuscitation HLTAID001

Provide Cardiopulmonary Resuscitation HLTAID001

- Providing CPR is a skill that is required across industries. Multi award winning, Corporate First Aid Australia (CFAA), are specialists in the delivery of First Aid and Community Services training.
- The unit of competency, Provide Cardiopulmonary Resuscitation HLTAID001' describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC).
- This unit applies to all workers who may be required to perform CPR in a range of situations including community and workplace settings.
- Training is delivered by experienced nurses who aim to make the day a fun, interactive and enjoyable hands on learning experience.

Training Pathway Options

At CFAA we recognise that learning takes place throughout our lives and that we all learn in different ways.

Are you 'refreshing' your CPR certificate?

This course is delivered in a one-hour session. We acknowledge that you have completed CPR training before and have prior skills and knowledge. There is no pre-reading or assessments required prior to your day of training. You will receive up to date information with your booking confirmation, should you choose to refresh your knowledge prior to the day.

Cost \$90.00

Maximum 10 participants per course

Are you new to CPR training?

Congratulations on taking the first step in learning to save a life. This course is delivered in a two-hour session. This option is recommended for anyone who has not completed a CPR course before. Pre-reading is required prior to your training and additional information will be emailed along with your booking confirmation. It is important to be familiar with 'DRSABCD' prior to attending the course. All assessments are completed on the day.

Cost \$90.00

Maximum 10 participants per course

Note: Prices are current for 2018 only and are subject to change.

Training Requirements

Note: This is a practical skills based course which includes assessments.

- Participants are required to perform CPR on a mannequin on the floor. If you have any injuries or think there is any reason, that you may not be able to physically perform this skill, please contact our office prior to enrolment.
- If you are concerned regarding your language, literacy or numeracy skills, then please contact one of our friendly team to discuss learning support options.

The CFAA difference

Training with CFAA ensures that graduates are 'work ready' and,

- the individual student experience is enjoyable, relevant and meaningful,
- the community services and health sector benefits by the delivery of contemporary streamlined training, and
- the community is supported by high quality trained community services and health professionals.
